NAME	ITEM NUMBER
VSG-10 Grinder	670061000

Removes epoxy and polyaspartic coatings after one pass

VSG-10 GRINDER & POLISHER

115V 10" STAND-UP, VARIABLE SPEED GRINDER & POLISHER

The VSG-10 grinder & polisher was designed for both large and small jobs.

On larger projects, the VSG works great as an edger or for accessing areas where your bigger equipment won't fit. A two-three car garage or basement can be prepped or polished quickly because of its high speed.

This machine has excellent coating removal production when used with PCD segments. The grinding plate accepts 3 or 6 "Fast Change" diamonds and are available in a variety of bonds and grits. With the velcro resin holders, any 3-inch resin, ceramic, or hybrid tooling will work.

Two people can easily lift this machine up or down a flight of stairs and the 115V motor makes finding a power supply really easy.

- » Variable Speed
- » Uses fast-change diamonds, PCDs, and polishing pads
- » Adjustment wheel allows different angles of the grinding plate
- » Weight bar can be positioned for aggressive weight
- » 10-inch shroud is made of heavy duty polyurethane
- » Made in U.S.A.

Motor	4HP (3kW)
Power Supply	115V, 15A electric
Maximum RPM	2,000
Weight	175 lbs. (80 kg)
